

```
wrong
import java.util.*;
class Iton {
    void main() {
        Scanner sc = new Scanner(System.in);
        int n;
        System.out.println("Enter n:");
        n = sc.nextInt();
        for (int i = 1; i <= n; i++) {
            System.out.println(i);
        }
    }
}
```

```
import java.util.*;
class oneton {
    void main() {
        Scanner sc=new Scanner(System.in);
        int n;
        System.out.println("Enter value of n:");
        n=sc.nextInt();
        for(int i=1;i<=n;i++)
            System.out.println(i);
    }
}
```

```
Enter value of n:
```

```
10  
1  
2  
3  
4  
5  
6  
7  
8  
9  
10
```
