→ Program - 4
```
import java.util.*;
class pattern {
  void main() {
    int n; int a = 1;
    Scanner sc = new Scanner (System.in);
    System.out.println ("Enter n:");
    n=sc.nextInt();
    n = sc.nextInt ();
    for (int i=0; i<n; i++) {
      for (int j=0; j<=i; j++) {
        System.out.print (a);
        a++;
      }
      System.out.println (" ");
    }
  }
}
```

```
rt java.util.*;
s pattern {
void main() {
        int n, a=1;
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter value of n:");
        n=sc.nextInt();
        for(int i=0;i<n;i++) {
            for(int j=0;j<=i;j++) {
                System.out.print(a);
                a++;
            }
            System.out.println(" ");
        }
}
}
```

```
Enter value of n:
5
1
2 3
4 5 6
7 8 9 10
11 12 13 14 15
```
